2025 CATALOG

YOU CAN NEVER CO WRONG WITH CARACE DOOR SOLUTIONS

STEP 1

CONSTRUCTION

When choosing a new door, you have three options on the construction of your door. First, there is our standard 2" non-insulated door, referred to as a Pan Door. Second, is our 2" thick Super Poly Insulated Door which includes a single layer of steel plus a rigid polystyrene core with 1/4" thick Super Poly Back Skin. Strong enough to walk on and is exclusively from Us. No other company offers it. Your third choice is our 2" thick Insulated Sandwich Steelback. Our Steelbacks are strong with a rigid polystyrene insulated core with a steel woodgrain textured back skin

Our Pan Door is strong, our Polyback is stronger and our Steelback is the strongest! Three good reasons to choose GARGAE DOOR SOLUTIONS.

STANDARD 2" THICK NON-INSULATED

GOOD

PAN DOOR YOU CAN NEVER GO WRONG WITH Us!

OUR STANDARD 2" thick non-insulated pan door features our exclusive raised shadow line for EXTRA STRENGTH. It prevents oil canning. Oil canning is waves and dips that pop and ping on the face of garage doors we provide extra strength for no extra cost! Garage Door solution uses our own Formula 124 steel that is thicker and heavier than other manufacturers 25 GA or 26 GA models. Strong and quiet are very important that is why we use heavy duty thicker end and center brace stiles to better support your door. Unlike others our end stiles are quiet bonded and mechanically fastened to insure quieter stronger op - eration. For second to none protection from the outside weather environment. We use a 1 Mil thick baked on polyester paint coating outside and unlike others, that use a 1/2 Mil □nish on the inside we use a full 1 Mil thick for better protection inside and out. Hot dipped galvanized steel construction for more protection is standard.

GOOD

R-VALUE 8

SO STRONG IT'S GOT A U.S. PATENT

Garage Door Solution has the strongest quietest and toughest poly back insulated door in the industry! Our patented Super Poly Back is a 2" thick insulated model that features a Unique 1/4" thick poly back skin that is so strong you can walk on it! Others use thin vinyl plastic that rips and punctures easily. They even turn yellow after a few years and peel o and ripple. We are the only manufacturer to make our super poly back insulated models with full sheets of polystyrene for second to none strength. Full 8 to 18 foot long solid one piece sheets of safe CFC free polystyrene is bonded to the steel with a patent pending urethane squeak free bonding process which is done right here in our factory! Other door companies manufacturers and sub standard distributors use standard all ready made pan doors and pop in thin vinyl skin polystyrene foam.

2" THICK SANDWICH INSULATED STEELBACK

BEST

STEELBACK

WITH AN R-VALUE OF 10... IT MAKES IT THE

BEST

Having a Garage Door Solution's Steelback is like having an insulated block wall that rolls up and down every day. They are stronger, quieter, safer, and also oler more security! Our steelbacks have a three layer construction that includes woodgrain steelback with safe, stable, rigid polystyrene insulation. Rigid polystyrene is not going to bubble, delaminate or become brittle like some of the higher R-value polyurethane doors being ollered by other companies. We only use rock solid polystyrene which is tried and time tested. Our Unique process of special density foam and two layers of steel with our pressure-max bonding say it all! Our steelbacks o□er rock solid performance because we only use solid sheets of foam unlike other companies that use multiple pieces to insulate. Our steelback is a stronger,

energy efficient, and a more quiet model.

STEP 2

FACT

READ PAINTING INSTRUCTIONS BEFORE PAINTING ANY DOOR!

All our Models come with the World's Quietest Hardware, regardless of Model or Type of Construction. Featuring a top of the line and one of a kind Heavy Duty Quiet System. Others charge more for less. Quiet is a standard here and will not cost you a penny more. Plus a Lifetime Warranty for peace of mind.
